

## **Outdoor Spaces, Decks, Porches \$45,000 - \$85,000**

This deck addition project converted two stories of small, screened porches into a dream deck! The usable living space increased by more than 300%. The homeowner now enjoys several options for relaxing and entertaining. The first story opens out onto brick pavers, keeps cool in the shade with fans, and has easy access to the backyard oasis. The second story has sliding screen doors that allow the entire covered porch space to be opened or closed. When opened, the second story porch invites you out on the expansive deck to relax in the lush landscape.
