

Bath \$36,000-\$56,000

The Covid-19 pandemic was in its early stages when construction was ready to begin for this bathroom remodel. To complicate things further, the client was nearing the end of her pregnancy and gave birth during the remodel. Our team overcame those hurdles by thinking outside the box, literally. In addition to following CDC recommended safety guidelines, the bedroom was sealed off from the rest of the home and both the trade partners and materials entered through an exterior bedroom door.

This primary bathroom was completely updated with all new lighting fixtures, plumbing fixtures, cabinets, countertops, flooring, and paint. There is a very natural mix and flow of materials in the new bathroom. The combination of natural wood grains, black hardware, and gold accents creates a modern spa-at-home vibe. The sleek and modern white tile of the shower picks up where the statement soaker tub leaves off, and the dark grey floors ground the entire space. This new bathroom is sure to be a luxurious focal point of this home for years to come.
