

## Commercial Greater than \$500,000

This commercial remodel converted a deserted Wendy's shell into a new Hardee's restaurant. Signage, canopies, awnings, and drive-thru updates were all included. A large interior demolition took place. The main seating area open to customers was completely refurbished with new flooring, lighting, cabinets, countertops, doors, seating, paint, and brand-new beverage station. The dining room service counter was custom designed and installed by our team. A lot of work was done to update the low voltage in the building for a modern restaurant, including compatibility with the Point-of-Sale system, audio/visual systems, digital menu boards, security, and WiFi. The kitchen workflow had to be adjusted and new kitchen equipment was installed. A custom display case was conceived, designed, and executed by our team. This is unique to this restaurant location and is a special touch for the owners who can now display their vintage Hardee's memorabilia.
